

Sucker suction cup

- A ring that fits on yoghurt pots and sticks them to the table
- 2 models of different to diameter

A ring that fits over yoghurt pots and fixes it to the table. Ideal for the very weak elderly or people with hemiplegia. This flexible neoprene ring can be slipped over the base of yoghurt pots or dessert ramekins to fix them to your table like a suction cup. It can be used on any smooth, non-porous surface (lacquered or varnished wood, plastic-coated surface or waxed cloth) to make it easier to pick up food without spilling. Simply lift the ring slightly with your finger to remove it.

The Sucker small suction cup is suitable for yoghurt pots (4 to 7.5 cm stretch diameter) and the Medium size one is suitable for institutional dessert ramekins (6 to 10 cm stretch diameter).
