

Medelert

- 817135

- **New : radio-controlled clock**

The Medelert is a handy device that allows users to take their medication safely and in the correct order. It is particularly recommended for people with memory problems.

The Medelert is fully automatic and only opens when it is time to take the medication.

It only dispenses the contents of the programmed compartment, and users cannot access the other compartments.

It has six audible alarms and a visual alarm on the lid (up to 30 minutes continuously).

It is easy to programme and allows the user to programme a week with 4 doses per day, 2 weeks with 2 doses per day or 28 days with 1 dose per day in a single operation.

Operates with 4 AA batteries (supplied).

1-year warranty.

Large diameter : 19 cm.
