

Hot or cold compress

- Hot or cold depending on the desired effect (pain treatment or muscle relaxation)
- Highly resistant woven cover
- Several models to choose from

The Hot Cold compress is ideal for use in thermotherapy or cryotherapy. When placed in the freezer, it remains malleable and can be used to treat pain. Heated in a tank, bain-marie or microwave, it helps relax muscles or prepare for exercise.

The Hot Cold compress is made from a non-toxic gel with excellent inertia properties and an ultra-resistant, reinforced PVC cover.

Comes with a soft, washable microfibre cover for direct application to the skin.

Models available :

- 23 x 13 cm
- 30 x 18 cm
- 40 x 30 cm
- Tri-section
