

## Suction cup grab bar - 29 cm

- **Installs in seconds without external assistance or tools.**

The suction cup grab bar secures a bathtub, shower or toilet without having to drill unsightly holes in the wall tiles. It can be installed in seconds without tools and is mainly used for support when getting out of the shower or bathtub.

The main advantages of a suction cup grab bar is that it can be installed and moved without assistance, tenants do not have to drill holes in tiled surfaces, and it can be transported easily when travelling as it is lightweight and compact. Press the two side levers and it will stick firmly to all smooth surfaces (tiles, ceramic, glass, lacquered paint, PVC shower cubicles, etc.).

Attached with 2 large suction cups.

Handle width : 11 cm.

Length : 29 cm.
