

Electric comfort heating cushion

- Mains powered, it diffuses gentle warmth.
- Stimulates blood circulation and soothes muscular pain.
- Back and neck version available

Our electric heating pad consists of internal heat-conducting fibres. Mains powered, it diffuses gentle heat continuously. In addition to warming up those who are cold, the heat stimulates blood circulation, relaxes and soothes muscle aches and pains. You have a backlit control unit with 6 heating levels. The fleece pillow can be malleable at will to place it on the part of the body you want. The supplied brown cover is made of plush microfibre washable at 40° and fastens with 2 snap buttons. High-quality brown bias finish fleece. Overheating protection.

Dimensions: 40 x 30 cm.

Power: 100W.
Lead wire length 2.30 m.

Guaranteed for 2 years.
