Zero Metal wheelchair

- 825034

- **Made entirely of nylon : it passes through airport security gates, MRI rooms, and secure companies.**

The Zero Metal wheelchair is the only manual wheelchair made entirely from plastic, allowing it to be used in certain specific environments.
Its design allows it to be used continuously in the shower and in aquatic environments, including swimming pools and spas. It is completely non-magnetic and can therefore be used in MRI rooms. It also passes through airport security gates and security checkpoints in secure companies. It has all the features of a standard wheelchair, including removable armrests and footrests.
