

Suction cup grab bar - 40 cm

- High-performance rubber suction cups
- With locking indicator

The 40 cm suction cup grab bar secures a bathtub, shower or toilet without having to drill unsightly holes in the wall tiles. It can be installed in seconds without tools and is mainly used for support when getting out of the shower or bathtub.

The main advantages of a suction cup grab bar is that you can install and move it without assistance, tenants do not have to drill holes in the tiles, and it can be transported when travelling as it is lightweight and compact.

Press the two side levers and it will hold firmly on all smooth surfaces (tiles, ceramic, glass, lacquered paint, PVC shower cubicles, etc.).

Its lock indicator shows whether the suction cup is correctly engaged.

Suction cup diameter : 10 cm

Length : 40 cm.
