

Modulo retractable bed rail

- **Bed rail designed to effectively secure a person in bed.**
- **Fits between the box spring and the mattress.**
- **Easy to retract**

Our Modulo bed rail can be used to effectively secure a person in bed. The supports of the bar are positioned between the bed base and the mattress. They have additional straps and fasteners for the other side of the bed. The rail can be folded away by simply pressing the 2 middle bars. When you reposition it upright, it automatically secures itself again.

Steel and polyethylene structure with foam handles. To be assembled.

Rail length 90 cm. Height from underneath the mattress 41 cm. Dimensions of the frame under the mattress: 90 x 40 cm. Safety strap adjustable up to a mattress width of 170 cm.
