

PositPro abduction pad grey

- Aubergine - 829082.A
- Taupe colour - 829082

- **Triangle-shaped cushion positioned at the crotch to support the lower limbs.**
- **Material from the latest innovations**

Our PositPro cushions benefit from technigel fibre, which provides unparalleled comfort for the patient. It exceeds the comfort performance of current polyester fibres, is less heavy and, above all, has a memory effect. It provides optimal cushioning to relieve pressure points.

They are fitted with the removable Steritex cover, the most resistant polyurethane on the market. Innovative, breathable and waterproof coating on a bi-elastic knitted base. Ideal for decontamination in the community and adapted to the strictest requirements in environments at risk of contamination. Its resistance to cleaning makes Steritex a product much appreciated by hygiene services. Washable at 90°C. Resistant to chlorine and autoclave.

Very soft and comfortable to the touch. Underwrapping for 100% cotton fibre.

Triangle-shaped cushions that support and abduct the lower limbs. Positioned at the crotch it acts in abduction of vicious positions (knees, calves, thighs). The use of this cushion allows to relieve and to distribute the pressure points of the patient and to prevent the appearance of the bed sore within the framework of the phases of nursing.

Dimensions: 30 x 15 cm.
