RS2 static transfer device

- 815198

- **Assistance with short transfers**

The RS2 transfer device allows caregivers to effortlessly perform short transfers between two rooms. It rotates at 360° without any additional effort, allowing the caregiver to position themselves correctly to seat the patient. The unit's adaptable-angle hand rest is very easy to grip firmly. Lightweight steel construction. Height-adjustable shin guards. The tray fits easily between the legs of a chair.

Base dimensions : 63 x 60.7 cm.
Handrail width : 53 cm.
Handrail height : 118.5 cm.
Adjustable shin guards from 29.2 to 46.7 cm. Weight : 14.9 kg.

Maximum user weight : 160 kg
