- Kit 4 - 825113
- Kit 5 - 825114

- **New pre-assembled kits**
- **Adaptable to your needs as much as possible**
- **Inclined plane, platform and angle available**

The Excellent Systems ramps in kit have received numerous awards and distinctions for their ease of installation and their precise adaptation to your needs. The kits are composed of parts to be assembled in polyethylene PELD or HDPE, an ecological and recyclable product. The top is anti-slip for ultra-safe use.

Once installed, the ramp can be used permanently or occasionally, as it is easily removable. Do not let thresholds and steps prevent the free movement of rollators or wheelchairs.

As the ramp is placed close to the obstacle, it does not interfere with the use of doors. The ramp can support a weight of 2 tons, which allows it to be used with vehicles. Non-toxic material that can be washed with the usual detergents.

5 models of angles available according to desired dimensions
