Stable tripod cane tip

- 816050

- **Compatible with any walking stick with a diameter of 19 mm**

A small, handy device that replaces an existing cane tip. It is very simple to use. Pull it up, and it stays in place so one can walk normally. Twist it in a quarter turn, and it repositions itself at the level of the pad, allowing the cane to stand upright on its own. Very easy to install.
Weight : 110 g.

Compatible with all walking sticks with a diameter of 19 mm.
