- **Numerous adjustments allow for universal use**
- **Crutch height 96 to 121 cm.**
- **Suitable for users between 1.50 m and 1.90 m tall.**
- **2 models**

Our Comfort ante-brachial crutch has a design that distributes your weight over the entire forearm. This distribution allows you to walk without feeling the pressure on your hands, as opposed to standard crutches.
Besides its shape, all points of contact with the user are padded with foam. Depth adjustments between hand and forearm (20/34 cm in increments of 1.5 cm) of hand rotation. Ideal 30° inclination for good distribution.

Crutch height 96 to 121 cm. Suitable for users measuring between 1m50 and 1m90.

Weight 996 gr.

2 models available :
- For right arm.
- For left arm.

Maximum weight: 100 kg.
