

Bagnoletto bed bath

- Focus on the physical and psychological well-being of your patient
- Can be used with only one operator

The Bagnoletto system is comfortable, convenient, fast and ensures accurate cleaning, reducing stress for the operator and discomfort for the bedridden person.

It can be used directly on the patient's bed, offering all the advantages of a full bath. It allows the use of running water in any room, without the need for electricity.

The Bagnoletto can be easily installed under the patient thanks to its side straps, just like changing a sheet. Once positioned, the edges are straightened and secured with corner loops. The system has several water drainage points and is supplied with 2 drainage pipes and a container.

Material: Blue enamelled PVC class 2C with polyester fabric coating. Cold disinfectable.

Dimensions: Length 190 x width 85 x height 20 cm.
