Track Wheel

- Double fork - 875036

- **Transform a wheelchair into a tricycle with surprising agility!**
- **Experience a new feeling of speed and freedom.**

The Track Wheel front wheel is the perfect companion for city, forest, or beach escapades : lightweight, easy to attach, and comfortable.
The Track Wheel has a large 12" pneumatic wheel and a carbon anti-flutter fork.
Its fast, 3-second, tool-free attachment system allows the wheelchair's swivel front wheels to be lifted, thereby reducing rolling resistance.

The Track Wheel is available in two models :
- The single-arm model featuring a fastening system on the wheelchair's rigid footrest. Its carbon design makes it the lightest product on the market, weighing only 2.6 kg.
- The double-arm model features a fastening system for wheelchairs with integrated fixed footrests. Lightweight carbon design: 4.5 kg.
The Track Wheel requires prior adjustment to the wheelchair used, so that the attachment is rapid for subsequent use.

Single arm dimensions : Length 65.8 x height 36 cm.
Double arm dimensions : Length 55.4 x height 47.9 cm.

Variantes :
- Double fork
