I-Walk hands-free crutch

Image: bequille

- **Extremely stable and hands-free**
-
-

While traditional crutches can cause pain in the hands and armpits, our new-generation I-Walk crutch takes the strain off the injured leg, while keeping the hands free.
So it's easier to climb stairs or go down slopes, use both hands for everyday activities, etc. With I-Walk, there's no extra strain on the thighs. The contact points are padded for extra comfort.

Total height adjustable from 65.5 to 96.5 cm. Width 17.5 x Length 40.5 cm.
Suitable for people between 1.50 and 1.95 m tall.
Upper thigh circumference min 37.5 / max 71 cm.

Maximum weight: 125 kgWhile traditional crutches may hurt the hands and armpits of the user, the new-generation I-Walk crutch relieves pressure on the injured leg while keeping the hands free.
This makes it easier to climb stairs or walk down slopes, keeping hands free for everyday tasks, etc. With I-Walk, there is no additional strain on the thighs. The contact points are padded for extra comfort.

Total height adjustable from 65.5 to 96.5 cm. Dimensions : width 17.5 x Length 40.5 cm.
Suitable for people between 5'2‟ and 6'5”.
Thigh circumference : min. 37.5 cm / max. 71 cm.

Maximum user weight : 125 kg
