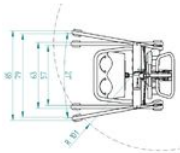
Rise Up verticalizer



- 825028

- **Comfortable for the user**
- **Effortless and efficient for the caregiver**

Frontal electric lift allowing to reach the vertical or semi-sitting position in a safe and comfortable way. The structure in painted steel tubes, combined with the possibility to move the feet away from the base by means of a foot pedal, guarantees maximum stability and safety during use. Thanks to the lumbar harness and the padded tibial supports, this type of semi-active transfer is particularly suitable for patients with difficulty in maintaining an upright position.

Weight 32 kg.

Maximum weight allowed: 175 kg.
