Turner rotation disc

- 815087

- **Enables safe, gentle, and controlled transfer**
- **Reduces the need to hold the patient**
- **Very easy to handle**
- **Quick storage system**

This transfer disc allows for safe, gentle, and controlled patient transfers. This unique device enables short transfers with significantly less effort for caregivers. It is particularly recommended for pivoting between two seated positions (bed to chair, chair to toilet seat). Simply place the patient's feet on the non-slip mats and their hands on the lower part of the hand rest. The tibial support ensures a comfortable and secure position. It rotates 360° on its own axis. Quick storage system. Epoxy steel frame with waterproof and washable padded foam shin cushion.

Dimensions : tray diameter 40 cm, handrail height 78 to 120 cm.
Weight : 7.5 kg.

Maximum user weight : 200 kg.

Date d'impression : 13/11/2026
