

Turner rotation disc

- 815087

- **For a safe, smooth and controlled transfer**
- **Reduces the need to hold the patient**
- **Very easy to operate**
- **Quick storage system**

This transfer disc offers a safe, gentle and controlled transfer of the patient. This unique device enables short transfers with much less effort for the nursing staff. It is particularly recommended for swivelling between 2 sitting positions (bed to chair, chair to toilet seat). Simply place the patient's feet on the non-slip mats and hands on the lower part of the hand rest. The tibial support offers a comfortable and secure positioning. It can be rotated through 360°. Quick storage system. Epoxy steel frame with waterproof, washable, padded foam shin pad.

Dimensions: tray diameter 40 cm, height. Hand rest from 78 to 120 cm.

Weight: 7.5kg.

Maximum authorised weight 200kg.
