- Bin 41l - 817315
- Refill 26l - 817316
- Refill 41l - 817317

- **Double seal appropriate for incontinence**

Janibell bins allow you to dispose of nappies and incontinence waste without encountering unpleasant odours. The double lid system ensures a tight seal. One press of the foot pedal opens the lid and allows access to the liner flap. The bags are arranged in a continuous stream, which is very economical to use. Once the end of the bag has been cut off at the notch in the flap, it can be tied into a knot and nappies can be inserted again.

This product is made of non-porous resin, which is extremely resistant. The smooth material is very easy to clean.

2 models to choose from:

26 litre model for storing up to 24 full nappies (288 in total). Dimensions: W 31.6 x D 26.7 x H 52.1 cm. Hatch 16.7 x 11 cm. Weight 2.5 kg.

41-litre model for storing up to 35 full nappies (560 in total). Dimensions: width 35.6 x depth 31.3 x height 58 cm. Hatch 18.5 x 15 cm. Weight 4.5 kg.

The refills consist of 2 large bags (288 x 2 for the 26 litre or 560 x 2 for the 41 litre).
