

Prima safety step

- **Stable and versatile support**

Our Prima stepping stool is used in the bathroom to step over the edge of the bathtub, but also to assist in everyday activities. It consists of a very strong steel frame and a plastic step with non-slip pads. The step comes with a side handle, but you can add another handle as an option to assist you in using both hands. The handle is padded and height adjustable. Lightweight structure: only 3.3 kg. Dimensions: width 52 x depth 29.1 x height 13.7 cm. 13.7 cm. Handle height adjustable from 82.5 to 97.8 cm.

Resistance : 190 kg
