

Pressotherapy I-Press II

- M - Device - 838155
- M - Boot expander - 838157.M
- L - Device - 838156
- One size - Belt - 838159
- One size - Sleeve - 838158.D

The I-Press II pressotherapy device is ideal for relieving circulatory system disorders in order to improve peripheral blood circulation. Its pumping action promotes venous return. The device comes with a pair of boots and two massage insoles. Double output splitter included to allow connection of two boots or two sleeves simultaneously.

Maximum nominal pressure 200 mmHg +-20%, maximum absorption 100 mA.

Therapy duration adjustable from 0 to 30 minutes.

Mains power supply.

Two-year warranty.

Two different sizes :

- Size M: maximum thigh circumference 64 cm, ankle circumference 50 cm.
- Size L: max thigh circumference 70 cm, ankle circumference 50 cm.

Options for the I-Press II pressotherapy device:

- Boot extenders allow the pressotherapy device to be used when the existing boots are not wide enough. Gain 10 cm around the thigh and 6 cm around the knee.
- Sleeves allow you to work on your arms. Upper arm circumference 56 cm. Wrist circumference 40 cm. Armpit-to-wrist length 88,5 cm. One size fits all.
- The belt allows individuals to work on their abdominal and lumbar muscles. Waist circumference 116 cm. Height 37 cm. One size. Recommendation for use: Do not use simultaneously with another option, only as a single output.
