

EUROVIT+ absorbent dressing pads

Sterile or non-sterile absorbent dressing, non-adhesive to the wound.

Closed on all four sides, with a blue mesh on the outer side for optimal positioning.

Consists of a soft, absorbent pad covered with: • cellulose film on the inner side, which allows exudates to diffuse. • on the outer side, a hydrophobic, air-permeable cellulose film.

Models available : Non-sterile in boxes of 50 or sterile in boxes of 10.

Sizes available :

- 10 x 10 cm
