Wheel decelerators for Space rollator

- 826272.S

- **Makes one's rollator safer to use by reducing its speed**

The wheels and speed control modules are attached to the frame in place of the rear wheels by simply screwing them in place. Each module on each side can be activated or deactivated. Each module can be slowed down to a lower or higher extent using its tightening knob.
The rear clearance width will be increased by 5 cm.
The kit includes 2 rear wheels and 2 speed reduction modules.

Product only compatible with the Space rollator.
