

Rechargeable shower brush

- 812026

• 5 different interchangeable brushes

Used without a handle, it is ideal for cleaning the face, upper parts of the body or feet when seated. Mounted on the long 40 cm handle, it can be used to reach harder-to-reach areas of the body, such as the back or the back of the legs... Once fitted to your head, these 5 different brushes rotate 360° and you can choose from 3 speed levels at the touch of a button on the head. Rechargeable and autonomous for around 3 hours.

Fully waterproof, it is rated to IP67 and can therefore be used in the shower in complete safety.

How to use: Once the brush is clipped onto the removable electric head, wet your skin and apply shower gel or cleansing lotion to the brush head. Press and hold the On/Off button to switch on the shower brush. For greater comfort and safety, never press the brush too close to the skin. Finally, turn the brush off and rinse it with clean water, then wring it out by turning on the rotating brush or air dry it.
