

Bedside alarm mat

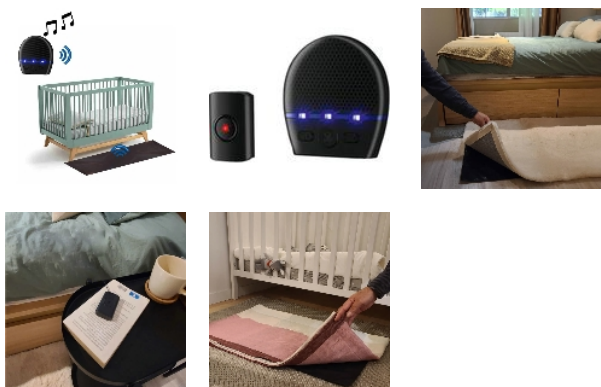

This mat is an efficient solution for remote monitoring of the elderly or dependent people (Alzheimer's, convalescence, sleep disorders, sleepwalking, etc.). It alerts you instantly if the person gets out of bed or falls out of bed, so you can intervene in time to assist the person and avoid an accident. 50 m range.

The bedside call button also sends a signal to the remote alarm.

The alarm mat is 1mm thick, so you can lay it over an ordinary bed mat.

Carpet dimensions : Length 100 x width 50 cm.
Made in France.
